EDUCATION

Digital University, Kerala

2023- Present

Bachelor of Science

Data Analytics with specialisation in Geoinformatics

Sree Narayana college,Chempazhanthy

2019-2021

University of Kerala

CGPA:7.306

Higher Secondary Education

2017-2019

Central Board of Secondary Education

Percentage:60

AISSE

2016-2017

Central Board of Secondary Education

CGPA:9.0

CARREER OBJECTIVE

Dedicated and analytical-minded MSc Data Analytics student with a specialization in Geoinformatics, aiming to leverage my expertise in data analysis, spatial data interpretation, and geographic information systems (GIS) to contribute to innovative and impactful projects. Seeking a challenging position where I can apply my technical skills, methodological rigor, and passion for geospatial data to support environmental research, urban planning, disaster management, and sustainable development initiatives. Committed to continuous learning and driven by a desire to solve complex spatial problems through data-driven solutions.

PROJECTS

Study about the Regional Geology of Trivandrum

- Our study area was a quarry near pullukadu a small village in Aakkulam,Kazhakootam
- The structural features present in the study area include joints,foliation,lineation. These features provide a detailed record of the history of deformation and permit us to determine the amount of strain and the amount of strain and the amount of displacement

Project on Data Analytics and Energy Management

- I took part in a cooperative data analytics and energy management initiative. Using data analysis, energy consumption was optimized, production increased, and costs decreased. Patterns were found, energy needs were estimated, and decision-making improved. Evaluated advantages like lower costs and more productivity while considering data protection. Exhibited an aptitude for teamwork, data analysis, and sustainable energy solutions

Project on Finding a Dynamic solution on the lack of exposure towards education and career guidance among the students of the tribal community

- Successfully executed both conventional and digital technologies to solve the lack of exposure on career and education among the students of the tribal. Showed excellent abilities in data collecting, project administration, and community involvement.We were able to find an dynamic solution to solve their issue and guide or assist them with proper guidance

TECHNICAL STRENGTHS

Geospatial Analysis	Knowledge GIS software such as ArcGIS, QGIS
Remote sensing	
Cloud Computing for GIS	Applications on cloud platforms such as AWS and Google Cloud.
Machine Learning	
Google Earth	
Data Analytics	
Programming for GIS	
PowerBI	
Latex	
Amazon Web Service	
SQL	
Data Analysis-Data analytics	
Python	
R Programming	
Presentation Skill	

PROGRAMMING LANGUAGES KNOWN

R
Python
SQL

ONLINE CERTIFICATIONS

Google Cloud Career Launchpad Data Analyst Track -Google

EXTRA-CURRICULAR

- Sports Committee Member at Social Engagement Center- Digital University Kerala, Thiruvananthapuram, Kerala
- National Service Scheme Volunteer- Sree Narayana College, Chempazhanthi, Thiruvananthapuram, Kerala

PERSONAL TRAITS

Highly motivated and eager to learn new things. I'm a committed professional with a strong foundation in geological education and a concentration on data analytics, especially geoinformatics. My area of expertise is the integration of data-driven insights with earth sciences to enable well-informed decision-making and unearth important geographical information. I'm excellent at applying interdisciplinary approaches to address urgent problems in a variety of domains, from maximizing spatial data analysis to comprehending geological processes. My dedication to using data analytics and geoinformatics allows me to develop creative solutions in our dynamic world. I have a strong desire to use my abilities to make significant contributions and produce worthwhile outcomes.
