ABOUT ME

A Dedicated M.Sc Data Analytics student specializing in machine learning, seeking a fast-paced role in AI and data science. Proficient in Statistics, Mathematics, and Analytics with extensive hands-on experience in Python for data analysis. Skilled in Python libraries such as NumPy, Pandas, Matplotlib, Seaborn, and Plotly. Adept at data manipulation and visualization, developing and implementing machine learning algorithms for regression and classification, and performing in-depth data analysis. Eager to leverage practical experience and academic background to support thoughtful decision-making and develop creative solutions in a forward-thinking team.

CORE SKILLS

- Data Analysis
- Data Cleaning
- Database design
- Data Visualization
- Machine Learning
- NLP
- Deep Learning
- Python Libraries
- Dashboarding
- POWER BI
- TABLAEU
- Latex & Gephi
- Python
- R
- SQL
- HTML

EXPERIENCE

DATA SCIENCE INTERN - LUMINAR TECHNOLAB

AUG 2022 - AUG 2023

Skills and Experience:

- Proficient in Statistics, Mathematics, and Analytics.
- Extensive hands-on experience with Python for data analysis.
- Skilled in Python libraries: NumPy, Pandas, Matplotlib, Seaborn, and Plotly
- Data manipulation and visualization.
- Developed and implemented various machine learning algorithms for regression and classification.
- Created data models and performed in-depth data analysis using Python.
- Experienced in SQL for basic and complex queries, including table creation, modification, and data joining.
- Developed reports and dashboards with Tableau and Power BI, connecting to diverse data sources.
- Experienced with the Hadoop ecosystem: HDFS, Hive, Sqoop, and Pig.
- Created powerful computer vision models using deep learning .

EXPERTISE TOOLS

Python
R
Python Libraries
SQL
MySQL
PowerBI Desktop
Excel
Powerpoint & Word
Jupyter
Colab
Visual Studio
Streamlit
Pycharm
Latex
Gephi

EDUCATION

**Masters in
Data Analytics
[MSc]**

Digital University
Present

**Data Science/Big
Data/AI/ML/DL/
Tableau/Power BI**

Luminar Technolab
2022
GRADE - A+

**Bachelor Of Science
in Physics
[BSc]**

University Of Calicut.
2020
CGPA - 7.1

**Higher Secondary
Biology**

Govt.of Kerala Board of
Higher Secondary
2017
CGPA - 8.8

RELEVANT PROJECTS

SPEECH EMOTION RECOGNITION

TOOLS : Python, Librosa
SKILLS : Machine Learning

Deployed a speech emotion recognition system utilizing machine learning . Decision tree were trained with Python, and Librosa to extract features and reach an 88% accuracy rate in emotion recognition . Improved the system's performance by identifying important emotional indicators through the analysis and processing of audio datasets.

COMMENT TOXICITY DETECTION MODEL

TOOLS : TensorFlow,Pandas,Matplotlib,TextVectorization
SKILLS : Machine Learning,Deep Learning,Model Evaluvation,Natural Language Processing[NLP],
Data Preprocessing.

This project trains a text classification model using TensorFlow to identify toxic comments. The code preprocesses the dataset, builds a sequential model with multiple layers, and trains it on the data. Evaluation metrics gauge the model's performance. After training, the model is saved and loaded for deployment, enabling users to input comments and obtain real-time toxicity predictions through a user-friendly interface. In summary, this project demonstrates the creation of a text classification model and an intuitive interface for predicting comment toxicity.
