PROFILE

An aspiring professional with expertise in Python, MEAN stack development, cloud technologies, and object-oriented programming (OOP), I offer a comprehensive set of technical skills to any team. I am keen to tackle complex coding challenges and develop efficient, reliable solutions. I also possess skills in Data Analysis, leveraging insights to guide decision-making. Collaborative and adaptable, I thrive in fast-paced, diverse environments and consistently deliver high-quality work and innovative solutions, making me a valuable asset to any technology-focused team.

EDUCATION

MSC COMPUTER SCIENCE WITH SPECIALIZATION IN DATA ANALYTICS (2023-Present)

Kerala University of Digital Sciences, Innovation and Technology (Digital University Kerala)

- Fabric Sense-An automatic thread counting application using Image Detection techniques.
- Project-Automatic Classification of Social Media Data Containing Medication Information using NLP.
- Project-Implementation and comparison of different ML models for Speech Emotion Detection.

BACHELORS IN COMPUTER APPLICATION

(2020-2023)

Christ Nagar College, University of Kerala, India.

- Project- SMART City: Reliable Waste Management System using Django framework.
- Project- Developed a website, "News@Tip" as news portal for netizens, using MEAN stack.
- Journal Presentation on "Artificial General Intelligence in Medicine".
- Secured a CGPA of 8.34

SKILLS

Technical Skills:

- | | |
|--------------------|---------------------------|
| • Machine Learning | • TypeScript |
| • Angular.js | • SQL |
| • Deep Learning | • Android app development |
| • NoSQL | • JavaScript |
| • Power BI | • Django |
| • HTML and CSS | • MongoDB |
| • Generative AI | • R programming Language |
| • PHP | |
| • Python | |

Languages:

Native in Malayalam and fluent in English and Hindi.

Soft Skills:

- Project Management
 - Problem-Solving Skill
 - Communication Skills
 - Presentation Skill
 - Team Leading Skills
 - Writing Skill
 - Interpersonal Skills
 - Time management
-

ACADEMIC PROJECTS AND PAPERS

- **Image Generator** – It is a Generative AI Model developed by fine-tuning a stable diffusion model to generate images from textual prompt.
 - **Music Generator** – It is a Streamlit application developed by using Meta’s Audiostream to generate music from textual prompts. A new model for the same task is under development.
 - **RAG Model** – A RAG Model was developed to support question-answer tasks regarding Intellectual Property Laws.
 - **Sentiment Analysis Model** – It is developed using NLP techniques to understand the sentiments behind textual reviews.
 - **Model to Predict Customers’ Purchase Behaviour**- K-means clustering algorithm-based model to group customers of a retail store based on their purchase history.
 - **Fabric Sense: Application for Thread counting**- It is aimed to automate the process of counting threads for quality assurance in handloom industry. It uses Image detection techniques.
 - **Automatic Classification of Social Media Data Containing Medication Information**-It is a project that uses NLP techniques.
 - **Implementation and comparison of different ML models for Speech Emotion Detection**- It is aimed at implementing different ML models to detect emotions from speech and also provide a comparison study of them to understand various metrics.
 - **Video-Emotion Recognition System**- An application that uses Machine Learning models to detect emotions from a video using image frames and audio.
 - **SMART City: Reliable Waste Management System**- Aimed to provide a city wide waste management system using IOT. The frontend design of the system was developed using Django framework, and it included additional features created using HTML, CSS, JavaScript, and Python. To connect with the Arduino code and SQL database, PHP was used.
 - A conference paper named, “Applications of Artificial General Intelligence (AGI) in Ophthalmology”.
 - A review paper named, “Cloud Computing in Addressing Insider Threats-Reinforcing Trust”.
-

CERTIFICATIONS

- Google Cloud Career Launchpad Generative AI Track
 - Google Cloud Career Readiness Data Analyst Track
 - Certification in MEAN stack
 - Certification in IOT
 - Add on course Android app development from Keltron
-

ACHIEVEMENTS

- Positioned amongst the 17 top scorers in English (0.01% of students) in the CBSE 10th standard Board Examination
- Winner of LIC Best Student Award
- Winner of Inter-Chinmaya Creative Writing Competition
- First Runner-up in Inter-Chinmaya English elocution Competition

VOLUNTEERSHIPS AND ACTIVITIES

- Served as Women Hackathon Coordinator under FOSS Cell
- Conducted several technical seminars and literacy programmes as a volunteer
- Music
- Art
- Reading
