EDUCATION

Kerala University of Digital Sciences, Innovation and Technology, Kerala, India.

2023 – present.

Masters in Computer Science & Specialization in Data Analytics

HHMSPB NSS College for Women, University of Kerala, India.

2020 – 2023.

Bachelors in Zoology

PROFILE

As a motivated MSC Computer Science and Data Analytics student, my focus lies in leveraging programming techniques to extract meaningful insights from data. With a foundation in programming, statistical analysis, and machine learning algorithms, I'm equipped to tackle data challenges. My dedication and keen eye for detail and extracting valuable insights while delivering results make me well-suited to contribute effectively to dynamic professional settings where data-driven decision-making is paramount.

PROJECTS & RESEARCH PAPERS

Research Paper – *A Preliminary Survey of Soil Arthropods in the Campus of HHMSPB NSS College For Woman (2023)*

In "A Preliminary Survey of Soil Arthropods in the Campus of HHMSPB NSS College For Woman" my team & I conducted a thorough investigation into these often-overlooked soil inhabitants. Our research highlights the importance of conserving soil arthropod biodiversity for sustainable agriculture and ecosystem resilience.

Project – *PolyReGen: Transforming Communities Through Sustainability (2024)*

As part of our DACE program, my project "PolyReGen: Transforming Communities" showcases our dedication to using technology for community betterment. Focused on the Vizhinjam community, my team & I utilized pyrolysis to address economic and environmental challenges. By converting waste into resources, we aimed to boost economic growth, reduce pollution, and promote resource efficiency, fostering a more sustainable future.

Project – *MedWords: Automatic Medication Information Classification via NLP on Social Media (2024)*

In "MedWords: Automatic Medication Information Classification via NLP on Social Media," my team & I aimed to automate medication content categorization on social platforms using Natural Language Processing (NLP). Our goal was to streamline this process for better access to reliable information, targeted interventions, and improved healthcare communication.

Secured a CGPA of 8.35

Sarvodaya Vidyalaya,
Trivandrum, Kerala, India.

2018 – 2020.

ISC Curriculum: Bio-
Mathematics

Secured a score of 72.62 %

JSS International School,
Dubai, UAE.

2012 – 2018.

ICSE Curriculum: Bio-
Mathematics

Secured a score of 82.40 %

Project – *Harnessing Machine Learning to Discover Potent HIV-1 Reverse Transcriptase Inhibitors: A Data-Driven Approach Using BindingDB and PubChem* **(2024)**

This project developed by my team & I, aims to develop a predictive model for identifying potent inhibitors of HIV-1 Reverse Transcriptase (HIV1-RT) using data from BindingDB. We'll predict IC₅₀ values for analogs from PubChem, facilitating the discovery of effective HIV1-RT inhibitors and contributing to the development of new treatments for HIV.

Research Paper – *The Synergy of AI and ML in Cloud Computing: A Paradigm Shift in Technology* **(2024)**

In "The Synergy of AI and ML in Cloud Computing," my study examines how combining Artificial Intelligence (AI) and Machine Learning (ML) is transforming cloud computing. We explore how this convergence reshapes traditional paradigms, unlocking new capabilities for data analysis, pattern recognition, and predictive modeling. Through analysis and case studies, we elucidate their collective impact on innovation, scalability, and efficiency.
