Dedicated M.Sc Data Analytics student with a focus on deep learning and machine learning, seeking a fast-paced role in data analytics or data science or AI. Attempting to make the most of analytical abilities and support thoughtful decision-making in a forward-thinking team. Eager to use my practical experience and academic background to develop creative ideas.

EXPERIENCE

Research and Development Intern | *June 2024 - Present*

AI model for Experience Document Parsing | *Domain - Natural Language Processing*

- As a Research and Development Intern at Digital University of Kerala, I am part of a team that leads a project focused on developing a model for extracting information from experience certificates, specifically targeting company names, seals on certificates and employment periods. I used Label Studio (Annotation of data) and YOLO (Object detection) to create training data sets and implemented sophisticated NLP, AI, Pattern Recognition and Deep Learning techniques. The extracted information can be used further to train model to identify whether a company is government or private and calculated total years of experience. The project leveraged technologies such as Python, Deep Learning, CNN, NLP, regex and YOLO, Visual Studio Code etc. The project is currently under development stage.

PROJECTS

Custom NER for Climate Documents using Spacy | *Natural Language Processing*

- Deployed a custom Named Entity Recognition model using Spacy for Climate change related documents and articles. Extracting information relevant to Climate change related documents and articles.

Heart attack Prediction using Machine Learning | *Domain - Healthcare Analytics*

- Created 5 Machine learning models based on the medical diagnosis data for heart attack prediction.

Target-Drug interaction mapping using ML models | *Bio informatics - Machine Learning*

- Understanding the complexities behind drug-target interaction for finding better medication and treatment processes paving a way towards personalised medicine.

ONLINE COURSES AND WORKSHOPS

Data Analyst Learning Path - Google Cloud Platform | *Google skillboost*

- * Completed the data analyst track gaining experience in GCP and getting certified skill badges in Looker, Big Query, Looker dashboard creation, ML API and Data Models.

Generative AI learning Path - Google Cloud Platform | *Google skillboost*

- * On going learning path of Gen AI, gaining more knowledge on the transformers, attention model, prompt engineering, etc. Certificated in prompt design in Vertex AI.

Excel for Beginners | *edx*

Equity Stock Market: Concepts, Instruments, Risks and Derivatives | *NPTEL SWAYAM*

Data Analytics, Tableau, Power bi, Gen AI, SQL, Prompt Engineering | *Jobaaj learning platform - workshops*

EDUCATION

Digital University Kerala

Master of Data Analytics with specialization in BioAI

Thiruvananthapuram, Kerala

September 2023 – Present

Mar Ivanios College

Bachelor of Science in Statistics

Thiruvananthapuram, Kerala

June. 2020 – March. 2023

Sarvodaya Vidyalaya

Science (Biology)

Thiruvananthapuram, Kerala

July. 2018 – March. 2020

TECHNICAL SKILLS

Programming Languages: Python, R programming, DBMS-SQL(Postgres)

Libraries: Pandas, Seaborn, Spacy, Scikit-learn, NLTK, NumPy, Matplotlib, openCV, Tensorflow

Developer Tools: Microsoft Power BI, Databricks

SOFT SKILLS

Problem-solving abilities, statistical proficiency

Time Management, Continuous Improvement, Touch Typing (40 wpm)

Ideation and Innovative thinking, Creativity and Flexibility

LANGUAGES

English, Malayalam-Native, Hindi
