PROFILE

I am passionate about data, machine learning and deep learning and enjoy pushing the boundaries of technology to tackle real-world problems. I am eager to give my expertise and fresh perspective to innovative projects, and I am dedicated to continual learning and improvement in areas such as LLM, AI, and beyond.

CAREER OBJECTIVE

Motivated data analytics student with strong problem-solving skills and a passion for technology, eager to apply my analytical abilities in troubleshooting and resolving customer issues. Skilled in utilizing data-driven insights, event logs, and proprietary tools to diagnose problems and collaborate with cross-functional teams. Eager to contribute to a dynamic team, provide excellent customer support, and gain hands-on experience in a technical environment to learn and grow together.

EDUCATION

2023/09 – 2025/07	MSc Data Analytics and BioAi Kerala University of Digital Sciences, Innovation and Technology	Trivandrum, India
2020/08 – 2023/06	BSc Biotechnology Maulana Abul Kalam Azad University of Technology	Kolkata, India

PROFESSIONAL EXPERIENCE

2024/08 – present	Data Analyst Intern Titan Tech Emirates ✕ I improved customer feedback ratings by 15% by proactively keeping customers informed on issue status and resolution steps.	Kochi, India
2024/08 – 2024/08	Data Science Intern Oasis Infobyte ✕ I extracted insights from complex datasets and build interactive dashboards and presented to clients.	New Delhi, India

SKILLS		
• Python • R Programming • Machine Learning • Generative AI • Git • Communication • Cross-team & Cross-product Collaboration	• HTML • DBMS • Deep Learning • Power Bi • Pandas • Troubleshooting & Debugging Tools (event logs, performance traces) • Problem Resolution & Case Management	• CSS • SQL • Tensorflow • Scikit-learn • Numpy • Log Analysis & Proprietary Tools • Customer Communication & Issue Resolution
PROJECTS		
2024/04 – 2024/06	Custom NER based Resume Parsing Model  Worked on building a custom NER based resume parsing tool to efficiently parse resume based on job description with the skills mentioned in the resume to ease the recruitment process. The model will map the job description along with a candidate's resume and give a visual representation of percentage matching of the resume with the job description. Successfully deployed the app in Streamlit.	
2024/05 – present	Image and Text-based Classification of Benign and Malignant Tumor  Currently working on building a Deep Learning model which can predict whether a tumor is benign or malignant based on Text description as well as images. I used different ML and DL algorithms like Random Forest classifier, Logistic Regression and CNN to train the model.	
2024/05 – present	Open source contribution to MetaAI - Llama3 model Currently working on fine tuning Meta's Llama3 based AI chatbot to add some useful features in it.	
LEADERSHIP EXPERIENCE		
2024/06 – present	Chief Executive Officer (CEO), Innovation Club Kerala University of Digital Sciences, Innovation and Technology Collaborated with cross-functional teams to resolve moderately complex issues, ensuring effective communication and timely solutions of the activity of the club.	
CERTIFICATES		
• Google Cloud Data Analytics Learning Path
