ABOUT ME

I am a motivated and enthusiastic individual with a deep curiosity for machine learning and data analytics. I excel at working with large datasets, uncovering intricate details, and deriving new insights. My passion for continuous learning drives me to stay updated with the latest advancements in the field, and I am always eager to learn about exciting developments that shape the future. I possess strong teamwork skills and can perform as a key player within any team setting. I am deeply concerned about resource conservation and aspire to contribute to a sustainable future. Additionally, I am empathetic and always ready to help my fellow beings, believing in the importance of compassion and support in both professional and personal settings.

SKILLS

Data Analysis	Machine Learning	Natural Language Processing
Data Analytics	Communication	Self-motivated
Data Cleaning	Python	Organized
Sentiment Analysis	Machine Translation	

PROJECTS

- **Sentiment Analysis:** Project that detects whether comments made are positive or negative.
- **NER for Oral Medicine:** A tool developed with the help of NLP tools that can recognize important entities in medical health records, useful for both medical practitioners and patients.
