PROFILE

Master's student in Data Analytics with specialization in Computational Science. Strong mathematical background, excellent knowledge of statistical methods, and computational techniques. Passionate about using data to solve problems and drive decisions. Looking forward to putting skills into practice and contributing to the continuous development in the area of data-driven technologies.

EDUCATION

MS.c. Data Analytics with a Specialization in Computational Science

Expected June 2025

Kerala University of Digital Sciences, Innovation and Technology,
Thiruvananthapuram, Kerala

BS.c. Mathematics

Christian College Kattakada,
Thiruvananthapuram, Kerala

June 2019 - April 2022

Percentage: 78.18

PROJECT EXPERIENCE

Identification of Waste Disposal Sites

Identified designated trash disposal sites by developing a geospatial model with techniques such as spatial regression. The initiative facilitates efficient trash disposal in panchayats and other comparable settings by assisting local government agencies and the community.

Suicide Ideation Detection from Text

A cooperative initiative that looks for signs of suicidal ideation in textual data by using several NLP models and methodologies. Collaboratively, the project sought to create efficient algorithms for recognizing and classifying suicidal phrases, thereby advancing research in the fields of computational linguistics and mental health.

Project on 'Graph Product'

We thoroughly investigated a number of graph products, such as the Cartesian product, Direct product, and Strong product, as part of a Graph Theory research on "Graph Product." This required examining characteristics such as identity, commutativity, and associativity. As a result, this study helped us understand the behavior of graph products and some of the situations in which they are used.

ONLINE COURSES AND CERTIFICATION

- Manage Data models in Looker
- Build LookML Objects in Looker
- Data Catalog Fundamentals
- Applying Advanced LookML Concepts in Looker
- Create ML Models with BigQuery ML
- Derive Insight from BigQuery Data
- Prepare Data for ML APIs on Google Cloud

- Developing Data Models with LookML
- Prepare Data for Looker Dashboards and Reports
- Analyzing and visualizing Data with Looker
- Introduction to Data Analytics on Google Cloud

VOLUNTEERING

- Member of Social Engagement Cell at Digital University of Kerala, Thiruvananthapuram, Kerala, India
- Member of Reading club at Christian College Kattakada, Thiruvananthapuram, Kerala, India

Skills

- **Programming:-** Python(Beginner Level)
- **Documentation Tools:-** LaTeX(Intermediate Level)
- **Operating System:-** Windows(Intermediate Level), Ubuntu(Beginner Level)
- **Data Analysis:-** NumPy, Pandas (Beginner Level)

LANGUAGES

- Malayalam(Expert Level)
- English(Intermediate Level)
- Hindi(Intermediate Level)
