OBJECTIVES

Aspiring data scientist having experience in using sci-kit, numpy, pandas, matplotlib, tensorflow libraries seeking opportunities in data science field

STRENGTHS

- Team player
- Goal oriented

LANGUAGES

- English
- Malayalam
- Hindi

PROGRAMMING LANGUAGES

- C
- C++
- Python

SKILLS

- SQL
- Tableau
- Data Science
- Machine Learning
 - Numpy
 - Pandas
 - Sci-kit
- Deep learning
 - Tensorflow
 - Keras
- NLP
- AI Chatbot
- Computervision
 - OpenCv
 - OCR

CERTIFICATION

- Python for datascience, IBM
- Introduction to Artificial intelligence, IBM Skills network
- Introduction to R, Great learning
- Data analysis using python, IBM Skills network

EDUCATION

- Msc Computer Science in Data analytics 2023-Present Digital University of Kerala
- BSC. Mathematics 2019-2022 V.T. Bhattathiripad College Sreekrishnapuram CGPA 6.15 A.K.N.M.M.A. Memorial HSS Kattukulam 77.5 %
- PLUS TWO 2017-2019
- SSLC 2018-2019 Sreekrishnapram HSS 91.5%

WORK EXPERIENCE

Datascience intern

Luminar Technolab, Kakkanad, Kochi
Sep 2022 - March 2023

As a datascience intern, I have gained strong background in statistics, machine learning and programming

- I am capable of doing model prediction, data visualization and data analysing
- I have gained knowledge about deeplearning and machine learning packages like numpy, pandas, sci-kit, matplotlib
- I am excited to continue my learning and growing as a datascientist.

PROJECTS

Vehicle Counter

- Project focused on the vehicle detection and number of vehicle passing through road
- Here I have used real time video and have done more preprocessing step for video and vehicle detection by contour method also number of vehicle count by line method
- Line method means I have drawn line in video and if a vehicle passed line, then it will take count
- Python libraries used : Opencv, Numpy

House Price Prediction

- This project is house price prediction using machine learning algorithms. The house prediction is based on the features like Area, Parking availability, etc.
- Here I have used algorithms like Randomforest regressor, Rigid regression, Extra tree regressor, etc and find best model and that is Randomforest regressor
- Python libraries used : Pandas, Sci-kit, matplotlib

DECLARATION

I hereby declare that the facts given above are genuine to the best of my knowledge and belief

Place: Palakkad
