🐙 <https://github.com/siddharthmohan14>

Motivated M.Sc Data Analytics graduate specializing in deep learning and machine learning, seeking a dynamic role in AI or data science. Aiming to leverage analytical skills to facilitate informed decision-making within an innovative team. Excited to apply my hands-on experience and academic knowledge to generate creative solutions.

EDUCATION

Digital University Kerala <i>Master of Computer Science with specialization in Data Analytics</i>	Thiruvananthapuram, Kerala <i>Sept. 2023 – Present</i>
Catholicate college, Mahatma Gandhi University (CGPA:6.3) <i>Bachelor of Science in Chemistry</i>	Pathanamthitta , Kerala <i>Jun. 2019 – Mar. 2022</i>
Alfeen Public School (CGPA:7.2) <i>Science (Computer Science)</i>	Kanjirapally , Kerala <i>July. 2017 – Mar. 2019</i>
Amrita Vidyalayam (CGPA:9.6) <i>10th Standard</i>	Pathanamthitta , Kerala <i>July. 2016 – Mar. 2017</i>

PROJECTS

- Social Media User Analysis** | *Natural Language Processing*
- Analyzing social media users with NLP involves collecting data from platforms like Twitter and Instagram, processing text for sentiment and topic analysis, and identifying key entities. User profiling and network analysis reveal behavior and influence. Tools like NLTK and SpaCy are essential for these tasks, providing deep insights into social media interactions..
- Infomation extraction** | *Machine Learning*
- This project aims to develop a robust information extraction system leveraging machine learning (ML) models to process and analyze coding-related questions.A critical part of the project involves the construction of a comprehensive dataset comprising various coding questions sourced from platforms like Stack Overflow, LeetCode, and HackerRank.The outcome of this project is a scalable and adaptable information extraction tool that can assist developers in quickly comprehending and solving coding problems, thereby enhancing productivity and streamlining the development process.

TECHNICAL SKILLS

Programming Languages: Python, HTML/CSS, DBMS-SQL(Postgres),Javascript
Libraries: Pandas, Seaborn, Scikit-learn, NLTK, NumPy, Matplotlib,Tensorflow
Web Development: Python,Django

SOFT SKILLS

Problem-solving abilities and Time Management
Organization and Leadership skills

CERTIFICATIONS

Certification in Python Django web development
Google Cloud career Readiness- Data Analyst Track.

LANGUAGES

English,Malayalam-Native,Hindi,
