🎓 EDUCATION

Masters in Computer Science

Specialization In Data Analytics

Kerala University of Digital Sciences,
Innovation and Technology (Digital
University Kerala)

09/2023 – present

Bachelor of Education

Baba Saheb Ambedkar Education
University

2021 – 2023 | Kalyani, India

Bachelor of Science in Mathematics

Netaji Subhas Open University

2018 – 2021 | Chakdaha, India

📄 EDUCATIONAL QUALIFICATION

Qualified Teacher Eligibility Test (WB-TET)

Primary

02/2023

Qualified Central Teacher Eligibility Test (CTET)

Primary Stage & Elementary Stage

08/2023

🏠 INTERNSHIP

Trainee Teacher

Chandmari Nagendrabala Balika
Vidyalaya

2022 | Kalyani, India

🌐 LANGUAGES

English

Hindi

Bengali

👤 PROFILE

Data Analyst with expertise in Python, machine learning (ML), deep learning (DL), and natural language processing (NLP). Skilled in using Power BI for data visualization and experienced in building convolutional neural networks (CNNs). Hardworking, dedicated to leveraging data for strategic insights impactful decision-making, and effective team collaboration to achieve results.

📁 PROJECTS

Potato Leaf Disease Classification Using Convolutional Neural Networks

- **Overview:** Built a CNN model to classify potato leaf diseases (Early Blight, Late Blight, Healthy) for early detection.
- **Implementation:** Used data augmentation, CNN with six layers, ReLU, Adam optimizer, and TensorFlow for preprocessing and deployment.
- **Key Learnings:** Gained experience with CNNs, TensorFlow, and data visualization tools for agricultural applications.

HR Analytics Dashboard using Power Bi

- **Overview:** Created a Power BI dashboard to analyze employee attrition, focusing on demographics, job satisfaction, and salary.
- **Implementation:** Developed calculated fields, custom measures (e.g., Attrition Ratio), and filters for detailed analysis.
- **Key Learnings:** Improved skills in Power BI visualization, DAX calculations, and data preprocessing.

Indian Legal Q&A using RAG

- **Overview:** Built a system to answer Indian legal queries using datasets from the Constitution, CrPC, and IPC, combining retrieval and generation.
- **Implementation:** Used all-mpnet-base-v2 for embeddings, FAISS for search, and Flan-T5-base for response generation.
- **Key Learnings:** Gained knowledge in RAG pipelines, embeddings, and pre-trained models like Flan-T5-base.

🧠 SKILLS

Programming Language

Python, SQL, HTML, CSS

Libraries

NumPy, Pandas, TensorFlow, Scikitlearn

Visualization

Power Bi, Matplotlib, Seaborn

DBMS

PostgreSQL, MySQL

Cloud Computing

Google Cloud, Amazon Web Services

🎮 HOBBIES

Reading Books

Playing Flute
