👤 PROFILE

Data Analyst with expert in SQL, Python programming, and machine learning, coupled with specialized knowledge in natural language processing (NLP). My expertise extends to front-end development, with proficiency in HTML, CSS, and JavaScript. I am passionate about leveraging data-driven insights to solve complex problems and enhance decision-making processes. Committed to continuous learning, I aim to contribute effectively to dynamic and innovative teams.

🧠 SKILLS

Data Analysis

- SQL
- Python Programming
- Machine Learning
- Natural Language Processing (NLP)

Front-End Development

- HTML
- CSS
- JavaScript

📁 PROJECTS

Clinical Management System Website

- Designed and developed a website for clinical management, benefiting both doctors and patients alike.
- Utilized Python and Django for backend development.
- Implemented HTML, CSS, and JavaScript for a user-friendly interface.

Mental Health Prediction

- Developed a mental health prediction model using Natural Language Processing (NLP) techniques to analyze and predict mental health conditions based on textual data.

Offensive Comments Identification

- Developed an NLP model to detect and classify offensive comments with a focus on detecting homophobia and transphobia comments.
- Utilized Python and machine learning techniques.

📜 CERTIFICATES

- Java OOPS Concepts
- Internship on Digital Skills conducted by ICT Academy of Kerala.
- Google cloud certification
